

Caribbean Reef Octopus, Intelligence of the Sea!

Who is the Caribbean Reef Octopus?

This project explores the secretive but amazingly intelligent Caribbean Reef Octopus and the threats to its ecosystem. The booth has on display a dead octopus that people can touch and feel for a hands-on way to learn the anatomy of the octopus. In addition, a 3D booklet presents ways that people can help coral reefs. After learning about these amazing creatures, visitors can leave their responses on paper octopuses to hang around the booth.
