

How do solar panels work?

Come see our solar panel exhibit so we can show you how they work and how they can be a great benefit to you. Our group will be displaying a real solar panel setup and a miniature model home powered by solar panels for your viewing pleasure. We'll also have a hands-on activity where you can play and experiment with solar panels so you can learn first-hand. Here, you will encounter lots of interesting solar panel knowledge supported by our in depth research and experimentation.
