

Gas Giant Mining

Hello, we are the Gas Giant Mining group. We will talk about how Gas Giant Mining can help the world. We would love to show and us our interactive. We will be talking about Mining, difference between Planets Gas Giant Ice Giant, renewable and non- renewable resource and how we can use this to our advantage. If you want to look up the fog machine, it is called a 400 watt compact metal gas fog machine. This machine will help us eventually in the world because we will run out of resources. We will need resources to live, but gas giant mining can help. When the world runs out of resources, the gas in space could help. Even the military will want power and the people with the resources will have the power to be able to help. These are some of the things we will talk about.
