

How Can Electric Scooters help the environment today?

Gas emissions from our cars lead to global warming, causing environmental changes. We propose that if more people use other forms of transportation like hover boards, we can cut down on pollution. Hover boards require the use of balance.

At our booth, you can experience virtual balancing by using the AccelMeter app. Young children can discover the world of hover boards by constructing one out of Legos.

Stop by and help us in our efforts to create a cleaner environment!
