

## **Why Is Blood Important?**

Students wanted to learn more about blood after a study of vampire bats. They first began wanting to know why vampire bats need blood, which then led to the essential question of “Why is blood important?” This question is not solely answered for vampire bats, but for humans as well.

Visitors will follow the study of this project through a variety of interactives, including learning about blood donation, the various components of blood, and extensive review of the circulatory, and many other activities!
